Innovate UK Knowledge Transfer Partnerships (KTP) bring together forward-thinking businesses and organisations, academics, and graduates to solve complex innovation challenges which help our economy, society, and environment.

KTPs support talented individuals into high-value employment, enrich academic institutions, and fuel the success and profitability of UK businesses.

Each collaboration is a three-way partnership between: a business or organisation with an innovative idea or challenge; a UK knowledge base with the expertise to deliver the innovation or solve the challenge; and a graduate who will drive the project forward to delivery.

This approach has proven highly successful in helping UK businesses and organisations innovate for growth since 1975. 83% of businesses engaged with KTP have reported increases in productivity, profitability, employment, or turnover.

The KTP logo

The KTP logo plays a central role in the KTP brand and must feature on every piece of communication.

As a preference, the full colour (positive) logo should be used. Where this is not possible, other versions of the logo are available.

Always ensure there is a good contrast between the KTP logo and its background.
The KTP logo clear space/minimum size

Clear space
The logo needs to be surrounded by an area of uninterrupted clear space to protect legibility and integrity and to allow it to remain prominent in all communications. Clear space is the non-print area surrounding the logo.

The minimum clear space has been defined as equal to the size of the UKRI block. This space is the minimum amount and should be increased wherever possible.

Minimum size
Relative scaling of the logo to increase or decrease the size is permissible, but to ensure legibility the minimum size for usage of the KTP logo is 35mm in print and 150px for digital.
The KTP logo
integrity: do not’s

The logo should not be misinterpreted, modified or added to. These are examples of what NOT to do to the logo.

- Do not stretch the logo
- Do not change the logo spacing
- Do not use non-branded colours
- Do not use imagery where the logo becomes illegible
- Do not add effects or shadows to the logo
- Do not outline or apply strokes to the logo
The KTP logo positioning

The logo naturally lends itself well to left alignment and so placement in the top-left corner is preferred, as demonstrated on the layout shown.

When using the converging arrows (see page 16), the logo may be positioned elsewhere in order to complement the overall composition. However, always ensure that the logo is still prominent.

Adherence to the clear space rule should always be followed. This has been defined as equal to the size of the UKRI block, which forms part of the logo.

The following logo sizes are recommended:
- A6 width: 38mm
- A5 width: 55mm
- A4 width: 80mm
- A3 width: 110mm
The KTP recognition taglines

These taglines need to be positioned at the bottom of a piece of designed material for a KTP project.

The taglines should be kept small and have sufficient clear space around them.

If the KTP project has a co-funder (Version 2), then they also need to be recognised on the piece.

Version 1
This KTP project was funded by UKRI through Innovate UK.

Version 2
This KTP project was co-funded by UKRI through Innovate UK and [insert co-funder name].
The KTP colour palette

Our colour palette is a valuable asset in keeping our visual identity cohesive and distinct.

The dark purple or white should only be used for the background. The light purple, green and dark blue should only be used in the converging arrows.

These colours can also be used in graphics or typography (see page 11). Always ensure a good contrast between any designed elements and their background.

All of our colours are designed to work effectively for both print and digital.

**Dark purple**
RGB: 138 26 155
CMYK: 65 100 5 40
Pantone: 2622
Hex: #8A1A9B

**Light purple**
RGB: 190 43 187
CMYK: 35 85 0 0
Pantone: 2068
Hex: #BE2BBB

**Dark blue**
RGB: 46 45 98
CMYK: 100 95 5 39
Pantone: 2758
Hex: #2E2D62

**Green**
RGB: 103 192 77
CMYK: 63 0 84 0
Pantone: 360
Hex: #67C04D
The KTP colour palette accessibility

When using typography in the digital space it is important to adhere to the Web Content Accessibility Guidelines (WCAG).

The table opposite shows specific colour combinations that should be used for text.

<table>
<thead>
<tr>

<td>Small text</td>
<td>(AA only)</td>
<td>Small text</td>
<td>(AA only)</td>
</tr>
</tbody>
</table>

On a white background, black or dark blue is the preferred option for body copy.
The KTP headline typefaces

Our typeface is Moderat. It is used for all our printed communications. Where possible it is also used for online applications.

**Display text**
Large headers, statements and pull quotes are set in Moderat Extended Bold.

**Functional titles and headlines**
Titles and headlines that are less emotive and more functional, are set in Moderat Bold or Moderat Regular.

---

To comply with the font usage rights, external users will need to buy a separate license from Tightype.
The KTP supporting typefaces

**Body copy font**
Our body copy, sub-headers and other small supporting text are set in Roboto.

Roboto is an openly available Google font. It is released under open source licences. It can be used for any non-commercial or commercial project.

**System font**
Our system font is Arial. It is used for system produced applications, such as PowerPoint, or the content of a letter.

We use Arial in three weights: – Regular, Bold and Black.

⚠️ Roboto can be downloaded from [Google Fonts](https://fonts.google.com)
Photography

Wherever possible, photography should show collaboration set within an appropriate research, business, or industry environment. Photography should show collaboration as a positive and dynamic process with a diverse range of people working together with purpose towards a shared goal. People featured in photos should portray dedication, engagement, and motivation.

Further information: Diversity can include characteristics such as cultural background and ethnicity, age, gender identity, disability, sexual orientation, religious beliefs, language and education. Diversity also includes characteristics such as professional skills, working style, location, and life experiences.

A range of photography is available as part of the asset pack.

Converging arrows

The three converging arrows are a flexible asset that can be applied to give a sense on direction and energy. These arrows represent the three participants (industry, academia and associates) driving the project to embed innovation into a business or organisation.

These arrows can be filled with block colour from our colour palette (see page 10), house messaging, and house imagery like the example opposite.
Converging arrows (block colour) implementation

When it comes to implementing the block colour arrows, there are a few overarching rules to take into consideration. Some of these rules are detailed on the next page.

01. The arrows can be used in their converged or converging state.

02. The arrows can move to accommodate a focal point, but **always ensure you use the supplied artwork files** and do not alter the path of the arrows.

03. The arrows should **never touch or overlap** each other.

04. The arrow ends should **always bleed off the page**.

05. **Only the large arrows can accommodate messaging.** For the dark blue and light purple arrows, always use white text. Black text can be used on the green arrow. See example on page 10.

06. When using the **smaller arrows**, they should **always be in a converged state** and used as a framing device.

07. The **positioning of the colours is flexible**. However, always use the three distinct colours. One for each arrow: dark blue, light purple and green.

08. All three arrows should **remain proportionate in size**.

09. Do not add additional arrows.

10. The angle at which the arrows are converging should never be altered.

11. The **arrows can accommodate any of the three colours** (see page 10 for guidance). When choosing your configuration, always ensure a good contrast with their background.

---

Always use the downloadable templates as a guide.
Converging arrows (block colour)
Used large: do not’s

Do not obscure important photographic detail

Do not alter the KTP colours in the arrows or the background. See page 10 for guidance

Do not change the size of the arrows

Do not change the orientation of the arrows or text
Converging arrows (block colour)
Used large: do’s

Ensure that the subject is clear and is not obscured by the arrows

Be creative. Compositions should feel balanced and natural rather than forced and over-thought

When using CMYK colours, a white background can be used to avoid colour contrast issues between the dark blue and dark purple

Messaging can be added to any colour of arrow. See page 17, point 5, for guidance on text colour
Converging arrows
(block colour)
Used small: do not’s

Do not use photography that will obscure the converging arrows. Consider an alternative colour configuration or photograph.

Do not position the arrows so they are over-cropped. All three arrows must be distinguishable.

Do not reduce the size of the arrows so they become indistinguishable. Use common sense to judge the visibility of the arrows and use the templates as a guide.

Do not use the smaller arrows in a converging state.
Converging arrows (block colour)
Used small: do's

Ensure a good contrast between the background image and the arrows

Be creative. Compositions should feel balanced and natural rather than forced and over-thought

The arrows are a flexible asset and can be used without photography

Only white or dark purple can be used for the background
Converging arrows (keyline and imagery) implementation

01. Arrow lengths can vary but the arrow heads must be in their converged state. (see example on page 24).

02. Keyline arrows should always house three images. One for each participant: business/organisation, associate and knowledge base.

03. The arrows should only accommodate imagery and not messaging.

04. The arrows should never touch or overlap each other.

05. The arrow ends should always bleed off the page.

06. Unlike the colour block arrows, the keyline arrows must always be used at a larger size as per the examples (see template pages at the back of this document).

07. The positioning of the colours is flexible. However, always use the three distinct colours. One for each arrow: dark blue, light purple and green.

08. The width of the keyline on the arrows is fixed and should not be manually altered. Always use the supplied artwork and scale proportionally.

09. Do not add additional arrows.

10. Do not alter the angle of the arrows. They should always be at right angles to the page you're working on.

10. All three arrows should remain proportionate in size.

Converged state

When it comes to implementing the keyline and imagery arrows, there are a few overarching rules to take into consideration. Some of these rules are detailed on the next page.

Always use the downloadable templates as a guide.
Converging arrows (keyline and imagery)

Integrity: **do not's**

- **Do not** use poorly cropped photography
- **Do not** use a mixture of photography and coloured arrows
- **Do not** use a photographic background when using arrows containing imagery
- **Do not** use non-branded colours for the arrow keylines
- **Do not** use the arrows only as keylines. They should always be block colour or keylines containing imagery
Converging arrows (keyline and imagery)
Integrity: do’s

- Ensure all photography is clear and that all participants are represented
- Dark purple or white can be used for the background
- The position or the arrows can vary. However, always position them at right angles to the page
- Arrow lengths can vary but the arrow heads must be in their converged state
